

Fundraise for Medics for Rare Disease

A quick guide for supporter fundraisers

**MEDICS
FOR RARE
DISEASE**

Thank you for choosing to support Medics for Rare Disease. Every pound you raise helps us improve awareness and education about rare diseases among healthcare professionals, ultimately helping people living with rare conditions receive better care. We're grateful for your support and are here to help where we can.

Before you get started

Please register your fundraising activity using our **Supporter Fundraising Registration Form**. This helps us support your fundraising, provide any resources you may need, celebrate your efforts and keep a record of fundraising activities carried out in support of Medics for Rare Disease.

Keeping Safe

You are responsible for organising your fundraising activity safely, including any permissions, insurance or safety measures that may be needed.

We're happy to offer guidance where we can.

Publicity

We'll support your fundraising where we can by sharing your event on social media, providing information about our charity, and answering any questions.

Please tag us in your posts if you'd like us to help spread the word
@MedicsforRareDisease.

Collecting & Donating Funds

We recommend using **JustGiving** or **CAF Donate** for online donations. If you'd like to create a fundraising page, please get in touch and we'll send you the relevant link and help you get started.

For goods sales (e.g. greetings cards), please state whether you are donating all proceeds or all profits.

If you have any questions about Gift Aid or paying in funds, please get in touch before your event.

Using our name & logo

You're welcome to say you are fundraising in support of MfRD, but please please contact us before using our logo so we can provide the correct version and any guidance you may need. Please do not imply your event is organised by MfRD unless agreed in advance, or alter our logo or use our branding in a way that could cause confusion.

We'd love to hear how your fundraising went and see any photos you'd be happy for us to share. Thank you for supporting Medics for Rare Disease and helping improve the diagnosis and care of people living with rare diseases.
